

ADDENDUM # 1
TO THE DISTRIBUTION AGREEMENT DATED 20.01.2026

Effective Date: 21.07.2026

Emerging Travel Inc., a Delaware Corporation, whose principal place of business is at 1000 N. West Street, Suite 1200, Wilmington, DE 19801 USA (the **"Distributor"**), entering into this Agreement through its commercial agent, **EMERGING TRAVEL ASIA PTE. LTD.** private company limited by shares, incorporated under the laws of Singapore, with UEN: 201927854K, Travel Agent license No. TA03682 with its registered address at: 68 Circular Road, #02-01, Singapore (049422), business address: 300 Tampines Avenue 5 #09-02, Tampines Junction, Singapore 529653 (the **"Agent"**), acting for and on behalf of Distributor .
and

Forhu Inc., duly incorporated and registered under the laws of the United States of America, having its registered address at 16192 Coastal Highway, Lewes, Delaware 19958, County of Sussex, represented by Mr. Jungkwan Shin, acting pursuant to the authority granted by the company, hereinafter referred to as (the **"Partner"**),

Distributor and Partner have concluded this Addendum # 1 to the Distribution Agreement as of 20 January 2026 (the «Distribution Agreement») as follows:

Definitions:

"API" means an application programming interface (API) through which Partner is granted access to the Booking System and Distributor Inventory.

"Distributor Inventory" means the hotel rooms and other types of accommodation and associated services (such as transfers, air tickets, etc.) available to Partner for booking from time to time in the Booking System, subject to the terms and conditions specified herein. It also refers to all information that is provided by Distributor via Distributor API, including, as and where applicable, static, and dynamic content, multilingual descriptions, photos, videos, rate descriptions, and rates, policies, possibly so-called geo data and functions (so-called Point of Interests/POI and the so-called "Matchmaker" function in particular) as well as information on room availability of the hotels and other types of accommodation.

"API Interface" means Distributor API or any API linkage between Partner and Distributor.

"Connectivity Platform" means a web-based platform (**TRAVELGATE**) used by Partner to acquire Services provided by Distributor that supports the API linkage between websites or booking systems of Partner and Distributor.

1. Unless otherwise follows from the essence of the present Addendum, words, and definitions used in the present Addendum shall have the same meaning as ascribed to them in the Distribution Agreement.
2. If Partner is granted access to Distributor Inventory in the Booking System through API Interface, then Partner shall use an application it controls, and which is integrated with the Distributor API to enable the exchange of relevant data related to Distributor Inventory and respective Bookings ("Partner's Application").
3. Partner acknowledges that it is responsible and bears all associated costs for the integration of the Distributor Inventory on Partner's Websites and that the Distributor Inventory will be integrated and used in the way defined hereunder.
4. Once Agent has verified that Partner's Application functions correctly, Partner shall ensure that the Distributor

Inventory, as received through API and Partner's Application, is promptly integrated with Partner's Websites and/or Partner's Applications (as applicable) so that Bookings can be made by Customers on Partner's Websites.

5. Where Partner is using API to access the Booking System, Partner shall be responsible for:
 - (a) promptly making and maintaining all necessary arrangements to access, use and interface with the Booking System in accordance with such specifications and guidance as Agent may stipulate from time to time;
 - (b) complying with those Agent's launch requirements as Agent may stipulate to be adhered to before API shall be used in a live environment with Customers and Partner shall allow Agent to confirm Partner's compliance with such launch requirements, either by allowing Agent to access to Partner's systems, or providing Agent with alternative evidence to its satisfaction to ensure that Partner is ready to launch no later than 6 months from the date of this Addendum or any later date agreed between Agent and Partner in writing (launch date). Partner shall not use Partner's Application in a live environment without Agent's prior written consent.

Should Partner fail to continue to comply with the launch requirements or any specifications, Agent may remove or restrict Partner's access to Distributor Inventory.

6. In addition, when using API and developing and maintaining Partner's Applications (as relevant), Partner shall use its reasonable endeavors to comply with any best practice and guidelines that Agent notifies to Partner from time to time.
7. Agent may provide Partner with access to the Distributor Inventory available only for booking at B2C or B2B Price or price on other special conditions agreed by the Parties to promote and distribute such Inventory on the approved sites listed below in this section.
 - 7.1. Where Distributor Inventory is made available to Partner at such prices, Partner shall not be permitted to make its distribution on terms other than those stipulated by the Parties in this section and/or provided for by the relevant tariff. If Partner fails to follow the restrictions imposed hereunder it shall be liable towards, and compensate, indemnify, and hold Agent and Distributor harmless for and against any direct damages, losses, liabilities, obligations, costs, claims of any kind interest, penalties, legal proceedings, and expenses (including, without limitation, reasonable attorneys' fees, and expenses) in connection or arising out of Partner's breach of its undertakings under this section.
 - 7.2. Distribution of Distributor Inventory:
 - (a) B2C Platform: Partner may promote and distribute Distributor Inventory on B2C Platforms, including via email marketing and any form of advertising and through its network of B2C partner marketing affiliates using the following API key ids: 17012
 - (b) B2B Platforms: Partner may freely distribute Distributor Inventory under B2B terms to a third party or related companies through its own platform without permission to redistribute it through API to any third parties, using the following API key ids: .
 - (c) B2B Platforms: Partner may freely distribute Distributor Inventory under B2B terms to a third party through its own API technology only, using the following API key ids:
 - 7.3. List of approved Partner's sites: <http://cheapestgo.com/>
8. Partner undertakes to implement procedures which would permit the upgrade of the Distributor Inventory in Partner's Application daily, or it would otherwise update the Distributor Inventory in Partner's Application for the Distributor Inventory which shall be displayed on Partner's Website or shall be distributed to Partner's Sub-Agents is relevant up to date, complete and accurate in all respects. Partner accepts and acknowledges that failure to update the Distributor Inventory in Partner's Application may result in Void Bookings and lead to

Customer's claims. Partner shall be liable towards and compensate indemnify and hold Agent and Distributor harmless for and against any direct damages, losses, liabilities, obligations costs, third party claims, claims of any kind, interest, penalties, legal proceeding, and expenses (including, without limitation reasonable attorney's fees and expenses) in connection or arising out of Partner's breach of its undertakings under this section. Where Partner repeatedly fails to update the Distributor Inventory as required hereunder, Agent may suspend Partner's access to the booking system or at the Agent's sole discretion unilaterally terminate the Distribution Agreement forthwith.

9. Agent may from time to time on reasonable notice require Partner at its own cost to take such steps as are required to integrate any modifications or updates that Agent and/or Distributor makes to the API, specifications, or guidelines from time to time with Partner's Applications. Agent will provide Partner with details of the required changes and deadlines to upgrade. If Partner fails to make such upgrades, Agent will have the right to stop providing support and Partner accepts that the availability of the API may be affected and that certain functionality or enhancements may not be available to Partner. If, because of Partner's failure to integrate such modifications or updates, Partner or Agent/Distributor incur any losses, Partner will be liable to reimburse Agent/Distributor for such losses.
10. If Partner developed the direct integration, Partner has the following obligations:
 - (a) Ensure that the mapping codes are updated.
 - (b) Display important information from static data ("metapolicy_extra_info" and "metapolicy_struct" from Hotel Data Dump);
 - (c) Update the static information once a day, Agent shall not be liable for outdated static data.
 - (d) Display rates information exactly the same way it was received, without any changes on the Partner's side.
 - (e) Display information from "tax data" without any changes that could affect the rate info before booking creation;
 - (f) Do not change booking cut-off on its side, cut-off should be adjusted only on Agent's side. Agent does not accept any incoming booking cut-off through API. If a booking cut-off was not provided in written form, it would be treated by default as an absence of booking cut-off. If a booking cut-off was provided to Agent in written form, it would be adjusted on Agent's/Distributor's side and should be the same on Partner side, meaning that the last Order Booking Finish Status should be requested at the last second of cut-off;
 - (g) Confirm a reservation as successful only in case when corresponding response is returned via Order Booking Finish Status method or Order Status Webhook.
 - Reservation can be confirmed as "failed" only if errors outlined in the API documentation shared by Agent, are received during Order Booking Finish, Order Booking Finish Status and Order Status Webhook
 - Reservation can be treated as completed only if "status": "ok" in response to Booking Finish Status method or "status": "completed" is received through Order Status Webhook.
 - The booking cannot be treated successful or failed if one of the mentioned (3 previous points) statuses was not received in response to Order Booking Finish or Order Booking Finish Status method. In case any 5xx HTTP statuses, non-mentioned or "unknown" error is received to Order Booking Finish or Order Booking Finish Status request, Order Booking Finish Status method should be performed again.
11. Neither Distributor, no Agent shall not be liable for rate discrepancy that might occur due to incorrect delivery or absence of nationality tag.

12. Distributor/Agent shall not be liable for wrongly treated meal plans codes. All meal plans codes should be aligned with <https://api.worldota.net/api/b2b/v3/hotel/static/>
13. If Partner's connection with Agent/Distributor is based on Connectivity Platform integration, Partner acknowledges the following:
 - (a) Distributor/Agent shall not be liable for rate discrepancy that might occur due to incorrect delivery or absence of nationality tag.
 - (b) Distributor/Agent shall not be liable for booking timeout stated on the Connectivity Platform. Partner should send a written request to Agent in order to change the booking timeout. Booking timeout should be adjusted only on Distributor's/Agent's side. Agent does not accept any incoming booking cut-off through API.
 - (c) Distributor/Agent shall not be liable for outdated static data provided by the Connectivity Platform to Partner.
 - (d) Distributor/Agent shall not be liable for wrongly treated final booking statuses and the Partner shall address any issue with wrong booking status directly to the Connectivity Platform.
 - (e) Distributor/Agent shall not be liable for wrongly treated meal plans codes.
 - (f) Distributor/Agent shall not be liable for Connectivity Platform wrong interpretation of rate details.
 - (g) In the case of disputed bookings, where it is determined that the Distributor/Agent are not responsible for any errors (through examination of logs and confirmation of the absence of issues on their end), but the issue lies with the Connectivity platform (such as breaches of logic or failure to update data in a timely manner), the Partner is required to pursue reimbursement from the Connectivity platform, as opposed to seeking compensation from the Distributor/Agent.
14. Agent reserves the right to restrict or suspend Partner's access to the API if Agent reasonably determines, in its sole discretion, that the volume of queries originating from Partner's use of the API is unduly burdening the API (or any of the associated systems, network devices or data), and/or creating capacity-related issues or resulting in any additional costs. Agent will promptly notify Partner of any such restrictions or suspension and Partner shall immediately proceed to make any necessary changes to the way in which Partner's Application interacts with the API. The restrictions or suspension shall be only lifted when Agent is satisfied, on its own judgment, that the orderly interaction between the API and Partner's Application has been fully restored.
15. Partner acknowledges that the access to the Booking System may occasionally be interrupted by scheduled or unscheduled downtime or for other technical reasons beyond Agent's control. Agent will use reasonable efforts to give to Partner a reasonable advance notice of scheduled downtime and will inform Partner as soon as practicable in case of unscheduled downtime.
16. Partner shall always comply with Agent's efforts to detect and prevent fraudulent transactions and cooperate with Agent by promptly implementing fraud-prevention security protocols, as notified to you from time to time including in the launch requirements.
17. Partner guarantees that Partner's Application shall comply with all PCI DSS standards and other requirements of international payment systems and Partner shall provide evidence of such compliance upon Agent's request. Where Partner fails to demonstrate its compliance with the PCI DSS standards and other applicable international protocols, Agent shall have the right, at its own discretion, to suspend Partner's access to the Booking System or unilaterally terminate the Distribution Agreement. Furthermore, Partner shall have the right to distribute the Distributor Inventory only to such Sub-Agents that are PCI DSS compliant.
18. This Addendum is effective from the Effective Date.
