

Global Short-Term House Rental Supply Partners

API, Affiliate, B2B, Channel Manager and Inventory Partnership Candidates for CheapestGo

Market review as of September 1, 2026 | Major global OTAs intentionally excluded

Executive Summary

This report focuses on local and regional short-term rental platforms specializing in houses, apartments, villas, cottages, farm stays, homestays and other non-hotel accommodation. Traditional global OTAs such as Booking.com, Agoda, Expedia, Airbnb, Vrbo and Trip.com are excluded.

For CheapestGo, the key issue is not simply the number of properties. The most valuable supplier is one that can support search, live rates and availability, and ideally booking creation through an API or structured B2B connection. Candidates are therefore ranked as A (priority outreach), B (high-value commercial discussion) or C (local inventory acquisition opportunity).

The strongest initial technical targets are Interhome, Adriatic.hr, Homestay.com, Wehome and Houfy. Together, they represent a practical foundation for a reusable Vacation Rental Supplier Adapter that can later connect additional country-specific platforms.

1. Priority A Candidates - Contact First

Priority	Market	Platform	Inventory	API / B2B	CheapestGo View	Link
A+	Europe	Interhome	~70,000 holiday homes	Distribution REST API; live availability and booking	Best large-scale distribution candidate	Partner Program
A+	Croatia	Adriatic.hr	Apartments, houses, studios and rooms	XML API; search, rates, availability, booking and cancellation	Strong end-to-end API fit	XML Service
A+	Global	Homestay.com	25,000+ homestays	JSON API feed; affiliate and supply partnerships	Distinct inventory versus hotel suppliers	Affiliate/API
A	South Korea	Wehome	Licensed home-sharing, hanok and short-term homes	REST/JSON Open API; commercial booking integration requires discussion	Key Korean local inventory source	Open API
A	Croatia	Adriatic.hr Subagent	Private accommodation inventory	B2B subagent model; XML and channel-manager related integration	Clear B2B contracting path	Subagent

Priority	Market	Platform	Inventory	API / B2B	CheapestGo View	Link
A	Global	Homestay Supply	Homestay host network	Property feed/API supply partnership	Can connect supplier-side inventory directly	Supply Partnership
A	US / Global	Houfy	100,000+ listings across 100+ countries	Open API exists; distribution rights require commercial agreement	Interesting owner-direct network	Houfy API
A-	Italy	CaseVacanza.it	~300,000 vacation accommodations	Uses API/feed-based supplier connections; reverse distribution requires agreement	Large Italian vacation-rental network	CaseVacanza.it
A-	France	Clevacances	Gites, houses, villas and apartments	Channel manager and distribution ecosystem; API rights require discussion	Strong French local inventory	Distribution Info
A-	China	Tujia	Large Chinese home-rental marketplace	JSON API infrastructure; public docs mainly supplier-to-Tujia, so outbound distribution needs negotiation	Strategic China access if distribution deal is possible	Open API

Important distinction: an API does not automatically mean CheapestGo can consume inventory. Some APIs are designed for suppliers to push inventory into the platform. Distribution rights, commercial terms, payment flow and booking ownership must be verified separately.

2. Asia-Pacific Local Supply Candidates

Country	Platform	Inventory / Focus	Integration Path	Priority	Link
South Korea	Wehome	Licensed home-sharing, hanok, homes	Open API / partnership	A	Website
Japan	STAY JAPAN	Farm stays, traditional houses and entire homes	iCal / Beds24 / AirHost connectivity; B2B inquiry	B+	Website
Taiwan	AsiaYo	50,000+ rooms listed on partnership materials	Partnership program	B+	Partnership
China	Tujia	Large home, apartment and villa network	API infrastructure; distribution agreement required	A-/B+	Website

Country	Platform	Inventory / Focus	Integration Path	Priority	Link
Indonesia	Travelio	Apartments and houses; daily/monthly/annual rental	Agent Partner program	B+	Agent Partner
Thailand	RentHub	Short-term apartments; strong Bangkok coverage	Direct commercial partnership required	B	Short-Term Rentals
Thailand	PoolvillaTH	Thai pool-villa specialization	Direct B2B negotiation	B	Website
Thailand	Gang Stay	Villas and owner-direct houses	Direct partnership	C+	Website
Vietnam	Bookvilla.vn	Local villas and homestays	Direct partnership	C+	Website
Vietnam	VinaRental	Da Nang / Hoi An houses, villas and apartments	Direct partnership	C+	Website

Note on the Philippines: Staykay should not currently be treated as an active supplier target because its website announced a wind-down/pivot. Local Philippine inventory should therefore be sourced from alternative property managers, villa operators and regional networks rather than relying on Staykay.

3. Europe - Highest-Priority Region for Vacation Rental Supply

Market	Platform	Inventory / Focus	API / B2B Path	Priority	Link
Europe	Interhome	~70,000 holiday homes	REST Distribution API	A+	B2B
Croatia	Adriatic.hr	Private accommodation	XML API + booking	A+	XML API
France	Gites de France	~55,000 accommodations	Commercial B2B discussion required	B+	Website
France	Clevacances	Gites, villas, apartments	Distribution/channel-manager ecosystem	A-/B+	Website
France	GreenGo	Eco-friendly and distinctive local stays	Partnership discussion	B	Partners
Spain	EscapadaRural	Rural houses and country stays	Commercial partnership	B+	Website
Spain / Portugal	Rentalia	20,000+ vacation accommodations	B2B discussion	B+	Website
Italy	CaseVacanza.it	Large vacation-home inventory	API/feed supplier ecosystem	A-/B+	Website

Market	Platform	Inventory / Focus	API / B2B Path	Priority	Link
Italy	Agriturismo.it	3,400 certified agriturismo	Partner program	B+	Partner
Germany	Traum-Ferienwohnungen	Large Ferienwohnung / Ferienhaus network	B2B negotiation	B+	Website
Netherlands	Micazu	~13,000 holiday homes	Large portfolios can contact sales	B+	Website
Netherlands / Belgium	Natuurhuisje	Nature homes, tiny houses and cottages	Partnership required	B	Website
Denmark / Europe	Landfolk	8,000+ handpicked homes in 7 countries	Direct commercial discussion	B+	Website
Denmark	Sol og Strand	7,000+ Danish holiday homes	Supply/distribution discussion	B+	Website
Denmark	Feriepartner	Private holiday homes	Agency/B2B discussion	B+	Website
Nordics / Germany	DanCenter	Holiday homes across Nordic markets	B2B discussion	B	Website
Sweden	Stugknuten	Swedish cottages and owner network	No public distribution API identified	C+/B	Website
Finland	Nettimokki	~4,200+ cottages and cabins	Direct commercial discussion	B	Website
Czechia / Europe	Flatio	Furnished short- and mid-term apartments	Partner / affiliate program	B+	Affiliate
United Kingdom	Simply Owners	8,000+ verified private homes	Owner-direct model; limited channel-manager approach	C+	Website
United Kingdom	Independent Cottages	Owner-direct UK cottages	Mostly direct-owner model	C+	Website
UK / Global	Clickstay	Villas, apartments and holiday homes	Owner/property-manager supply discussion	B	Website

4. Americas and Oceania

Market	Platform	Inventory / Focus	API / B2B Path	Priority	Link
US / Global	Houfy	100,000+ listings in 100+ countries	Open API; commercial distribution rights require agreement	A-/B+	Website

Market	Platform	Inventory / Focus	API / B2B Path	Priority	Link
Canada	CottagesInCanada	~3,000+ cottages	Owner-direct / commercial partnership	B	Website
Canada	Cottages-Canada.ca	~1,600+ cottages	Direct partnership	C+/B	Website
New Zealand	Bachcare	Holiday homes across 180+ destinations	Professional property manager; wholesale/distribution discussion	B+	Website
New Zealand	Holiday Houses	~5,800+ listings	B2B partnership discussion	B+	Website
Australia	Alluxia	Luxury holiday houses and boutique stays	Direct partnership	B	Website

5. Recommended Top 12 Outreach Order

Rank	Platform	Why It Matters
1	Interhome	~70,000 homes + OTA distribution API + booking capability
2	Adriatic.hr	XML supports search, availability, pricing, booking and cancellation
3	Homestay.com	JSON API + 25,000+ homestays + affiliate/supply models
4	Wehome	Differentiated licensed Korean home-sharing inventory
5	Houfy	100,000+ owner-direct listings; open API exists
6	CaseVacanza.it	Large Italian vacation-rental network and feed-driven ecosystem
7	Landfolk	8,000+ curated homes; high share of distinctive/exclusive inventory
8	Gites de France	~55,000 strong local French accommodations
9	STAY JAPAN	Traditional homes, farm stays and legal Japanese private accommodation

Rank	Platform	Why It Matters
10	AsiaYo	Large Taiwan/Asia supply and an established partnership organization
11	Bachcare	Professional New Zealand holiday-home operator with national reach
12	Clevacances	Strong French local network with distribution/channel-manager structure

6. Recommended CheapestGo Supply Architecture

Hotels: Keep conventional hotel inventory connected through wholesale suppliers such as TravelGateX, RateHawk or similar hotel distribution sources.

Flights: Continue the flight layer through Duffel or equivalent air distribution APIs.

Vacation Rentals: Build a dedicated inventory layer around Interhome, Adriatic.hr and Homestay.com first, because these have the clearest distribution and structured integration paths.

Country-Specific Differentiation: Add Wehome, STAY JAPAN, Gites de France, Landfolk, Bachcare, Travelio and similar platforms to obtain inventory that general hotel APIs often do not surface well.

Positioning opportunity: CheapestGo can evolve from a hotel-price comparison service into a global AI accommodation search network that combines hotels, apartments, houses, villas, cottages, cabins, farm stays and homestays in one interface. The most defensible differentiation will come from inventory that is difficult to obtain through conventional hotel wholesalers - traditional houses, hanok, farm stays, lake cabins, rural cottages, pool villas and professionally managed private homes.

7. Immediate Technical Recommendation for the Development Team

1. **Interhome Distribution REST API** - Use as the primary reference for a mature vacation-rental distribution model.
2. **Adriatic.hr XML API** - Use to model end-to-end search, rate, availability, booking and cancellation flows.
3. **Homestay.com JSON API** - Use to model a lighter affiliate/feed-based accommodation integration.
4. **Wehome REST API** - Use as the reference for local Korean home-sharing inventory and assess what additional booking endpoints would require a commercial agreement.
5. **Houfy Open API** - Evaluate API scope and negotiate whether its owner-direct inventory can be commercially redistributed inside CheapestGo.

Recommended engineering principle: Do not hard-code every supplier separately. Create a common Vacation Rental Supplier Adapter with standardized objects for property, unit, rate plan, availability, taxes/fees, cancellation policy, booking, cancellation, media, geolocation and host/property-manager identity. Each new supplier should then be mapped into the same internal schema.
